[About Us](#)

QUALITY AND VALUE

ExamDumpsVCE Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all dumps.

TESTED AND APPROVED

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

EASY TO PASS

If you prepare for the exams using our ExamDumpsVCE testing engine, it is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

TRY BEFORE BUY

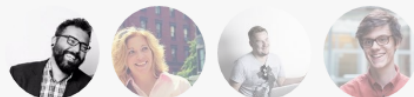

ExamDumpsVCE offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

CUSTOMERS FEEDBACK

The price is really not cheap but I am happy to buy it. It is quite valid. Only hundreds questions. One of my colleagues buy the dumps made of 500+ questions. Really lucky.

Title : Oracle Order Management
Cloud 2017 Implementation
Essentials

Vendor : Oracle

Version : DEMO

NO.1 Your company wants to define different status conditions for fulfillment lines that have different categories assigned to a single orchestration process in Order Management Cloud. Which two configurations would you perform to meet this requirement? (Choose two.)

- A. Create a unique step for each category and assign different "next expected task statuses."
- B. Define orchestration process status values for each category.
- C. Assign the status catalog to the orchestration process.
- D. Define a fulfillment line status rule set for each category.

Answer: B,C

Explanation

An orchestration process is a predefined business process that coordinates the orchestration of physical goods and activities within a single order and automates order orchestration across fulfillment systems.

NO.2 Identify the Order Management configuration setup that must be performed by a system administrator in order to define an external source system connector.

- A. The connector service needs to be registered by using Manage Web Service.
- B. The source system needs to be registered in Manage Web Service.
- C. The source system needs to be called by using the web service from Cloud Order Management.
- D. The source systems link needs to be registered in Manage Web Service.

Answer: A

NO.3 The orchestration process fulfillment task is performed by an external system and you need to register the connector to integrate the non-Fusion system.

Which two steps would you perform to invoke the external connector service endpoint URL? (Choose two.)

- A. Create a new routing rule for the fulfillment task to call the connector.
- B. Create a new web service connector to register the endpoint URL.
- C. Create a new routing rule for the fulfillment task to call the endpoint URL.
- D. Create a new fulfillment task service to register the endpoint URL.

Answer: A,B

NO.4 You are importing sales order data from a source system. You want to delete the imported sales orders from interface tables to save storage space. How would you do this?

- A. Run the ESS job Purge Interface Tables.
- B. Delete the orders from the Order Management work area.
- C. Delete the orders from Oracle Content Server.
- D. You cannot delete orders from interface tables.
- E. Run the ESS job "Delete Orders from Interface Tables."
- F. You must request the system administrator to delete orders from interface tables.

Answer: E

NO.5 Identify two tasks that are used to set up statuses in the orchestration process configuration in the Functional Setup Manager. (Choose two.)

- A. Manage Orchestration Status
- B. Manage Task Status Condition
- C. Manage Orchestration Status Values
- D. Manage Status Values

Answer: A,B

NO.6 You are in the process of setting up a constraint that prohibits update to an extensible flexfield in a fulfillment line if Ship From Warehouse is X and the fulfillment line is booked. You are able to see the extensible flexfield on the "Manage Constraint Entities" page but not on the "Manage Processing Constraints" page.

What could be the reason?

- A. The extensible flexfield is not enabled.
- B. The "generate packages" program was not submitted.
- C. A "Record Set" needs to be created for the extensible flexfield to be visible on the "Manage Processing Constraints" page.
- D. The "Publish extensible flexfield" process was not run.

Answer: C

Explanation

A record set is a group of records that are bound by common attribute values for the purpose of constraint evaluation. You can define conditions and specify a record set to be validated for a given condition as defined by the validation template.

NO.7 You are using the Check Availability feature to explore alternative ways of promising a batch of five fulfillment lines in simulation mode.

Which three attributes can you change to explore other promising options? (Choose three.)

- A. Allow substitute items
- B. Requested ship date
- C. Scheduled ship date
- D. Requested shipping method
- E. Requested Ship-from warehouse
- F. Requested Quantity

Answer: B,D,F

NO.8 Which statement is true about the definition of source systems in Functional Setup manager?

- A. The Oracle Fusion order capture and fulfillment system is defined as Fusion.
- B. All external order capture systems are defined as Spoke systems and external fulfillment systems are defined as purchased.
- C. All order capture and fulfillment systems are defined as Spoke systems.
- D. All external order capture systems are defined as Spoke systems and the Fusion fulfillment system is defined as Fusion.

Answer: A
